

# FUNCTIONAL SPECIFICATION DOCUMENT

## DEVOTEE MANAGEMENT SYSTEM:

**GOAL:** Allows users to successfully use this app to have a follow-up on the temple's pooja's conducted, registration to be made, and all other devotee services needed.

### REQUIREMENTS:

- A form to have a list of all poojas conducted in the temple. This form will hold information like the dates on which special occasions fall and the poojas that are to be held on that day and the schedule of poojas that are held on a daily basis with timings.
- A form that allows the user to enter all his information required. This information will include the details of his family also along with their birthdates so that special pooja could be scheduled on that specific day.
  - The form should also ask the user for the period he has registered (eg. 6 months or 1 year or so).
  - This form will be linked up with the previous form in order to schedule the pooja according to the user details.
- A form that contains the payment details of the user. Information like the total amount he has paid and the

corresponding pooja for which he has made the payment will be included.

- Finally, a form to show the admin a report of all the information. The devotee details, the devotee's pooja details, and his payment details are the information to be shown in the report form.

## **GROCERY MANAGEMENT SYSTEM:**

**GOAL: Online delivery app-** Allows users to successfully use this app to view the available items along with their details and make an order online.

### **REQUIREMENTS:**

- A form to display all the items in the store along with their price, whether it is left in stock or not, and whether there is a discount available for that product or not.
- A form that allows the user to place his orders from the details of the above form that will be displayed. Therefore this form has to be linked up with the previous form.
- A form that sums up the price of all the products that the customer has ordered and reductions will be made based on the discount if it is available. This form will also include the payment details of the user and the payment will be made in this form.

- Since it's an online delivery app a form that allows the user to track his order and the shipping details will be included here.
- Finally, a form to display all the orders made on that particular day and the total sales that were made. This form will be available only to the admin.
